

Financials - The core functionality of any accounts software package centers on a strong set of financial ledgers. With Intact 'Financials' you will have the integrated tools to fully control your business and processes to help you grow and profit.

Order Processing - In any stock management system, the sales and purchase order process form the core element of stock movements. There is no 'one size fits all' system but Intact can provide the best model to suit your unique requirements with over 2,000 user configurable flags.

Stock Control - The control and movement of stock is essential to any business which is why we have put more resources into the stock related elements of our software than any other single module. These include 'Stock by Size', 'Stock Item Images', 'Bill of Materials', 'Fixed Assets Register', 'Mobile Warehouse', 'Repak' etc.

Invoicing - Intact offers a variety of options when it comes to invoicing.

- **Direct Invoicing** – for simple straightforward invoice raising.
- **Advice Notes** – for trade counter applications where goods are supplied.
- **Point of Sale** – for retail/trade environments with high volume of transactions.
- **Cash Point** – for dedicated 'cash lanes' with high percentage of cash transactions.
- **Order Processing** – for invoices resulting from a complex sales cycle.

Point of Sale – An easy to use order entry screen that utilizes barcodes, stock item images and other features. We understand that every single POS system has different requirements and so we tailor each system to suit their particular needs. The software can also be used across a number of stores with effective distribution control to allow stock levels at each store to be monitored.

iManager - With our iManager dashboard, it has never been easier to see everything you need on one screen including financial details, product information and customer supply details. With the ability to see real time data at a glance you can effectively identify, track, trend, and correct problems as you evaluate the health of key areas of your organisation.

Credit Control – Getting paid for goods supplied and/or work carried out is vital to the survival of any business. Our 'Credit Control Manager' will assist you in this task by providing you with instant access to debtor call history, chronological cash collection information, immediate credit stop facility, promised payment reminders etc.

Data Drill – The 'Data Drill' feature provides state-of-the-art interactive data mining and analysis. This tool complements Intact's reporting engine by providing real time inquiry of your sales, purchasing, nominal and stock information.

Telesales – The telesales module will allow you to increase the efficiency of your telesales department by coordinating your telesales team. It is a simple intuitive solution designed with a single goal in mind and that is to make your operators more effective at converting prospects to customers.

CRM – This module will assist companies who operate a Sales Rep system to monitor and manage communication with your customer base. It is easy to use and customer friendly. It will allow you to record all correspondence, communication and pertinent information for both potential and existing customers.

inVision – For those companies who need to prepare monthly management accounts to present to a Board of Directors, the inVision module is the perfect tool for you. Effective tailoring of inVision will result in saving hours and hours of time spent preparing management information.

Bill of Materials – The Intact 'Bill of Materials' module allows the user to configure items to control the stock of raw materials or to sell items that exist in kits.

Job Costing and Time Recording – In many businesses, tracking the cost and time elements of individual projects is of vital importance from a financial perspective. To control costs on a project by project basis and to track progress, Intact offers these comprehensive and wide-ranging features.

E-commerce – This allows companies to expand their business on to the web by providing an interface for customers to view account details and shop on-line. Companies can also deal electronically with their customers e.g. send invoices/statement/reminders via email and make electronic payments.

Loyalty Points – This facility allows you to offer loyalty cards to customers to encourage them to accumulate points as they shop in your store.

Serial/Batch Tracking – This module allows a company to add a further element of traceability into their stock control. As well as being able to determine the location and bin number of the stock item, the user can see which batch the item is allocated to.

Fixed Asset Register – This module allows those companies carrying a large amount of fixed assets to monitor the cost of these assets as they are added or depreciate. With several different depreciation mechanisms built into the module, the fixed asset register becomes an integral part of the business.

Mobile Warehouse – Intact have a range of 'Mobile Warehouse' modules which allow the user to embrace modern technology for stock taking, purchase ordering and much more.

Sub Contractors – This module facilitates accounting for payments and invoices relating to sub contractors and may be of interest to those in property development.

Signature Capture – This module allows you to capture a signature on a docket at the counter. The signature is encrypted and attached to that document for future reference.

Cash Point – This module allows stores with a 'cash Lane' configuration to implement a dedicated cash point of sale which handles transactions in a speedier fashion – also available in touch screen.

Document Management – For those companies wishing to implement document management and retrieval systems, we have integrated solutions with third party providers.
