Senior Developer Opportunities

We are seeking to appoint Senior Developers to join our rapidly growing technology team, based in our Headquarters in Dundalk. The successful candidates will work in a fast-paced Agile environment where you can expect a great variety of Customers, Projects and learning opportunities.

Job summary:

Intact's aim is to become the no.1 trusted provider of ERP software in the UK and Ireland and our unique selling point is our fully owned software and its highly configurable ability.

You will be a senior member of the Development team working on complex applications across the full development lifecycle, as well supporting and extending existing solutions. You will deliver high-quality code, and there will be many opportunities to acquire new skills and broaden existing ones.

We are seeking to recruit individuals who will love the Software as much as we do and who can demonstrate an ability to work in a fast paced environment.

Key Responsibilities:

- Participation in our scrum development process
- Design, build and maintain efficient and reusable C# code
- Performance analysis
- Supporting other company departments – QA, professional services, technical support and sales
- Interact closely with peers, next-level team members and managers to resolve customer issues.
- Have the courage to challenge processes and practices in our goal for continual improvement

Knowledge and Experience

- Deep knowledge of .Net and its supporting eco system
- Windows Forms experience
- SQL Server (or equivalent SQL database) knowledge
- Exposure to Xamarin for mobile development useful
- Understanding of design patterns for reusable code maintenance and architecture
- Knowledge of the DevExpress component suite
- Previous experience and understanding of ERP systems (Sales, purchasing, Inventory, project costing, accounting) would be considered an advantage
- Between 5-10 years' experience in a .Net environment is considered essential
